

Diagnostic Testing Requirements

In order to consider your child's application, Landmark School requires a full narrative report that indicates the presence of a language-based learning disability. This evaluation must have been administered within the past three years. The following measures are required:

I. Cognitive Assessment: Wechsler IQ Scales

Full WISC-V (Wechsler Intelligence Scale for Children) for students age 16 and under

or

Full WAIS-IV (Wechsler Adult Intelligence Scale) for students age 16 +

Please note that the WASI (Wechsler Abbreviated Scale of Intelligence) is not acceptable as a substitute for the WISC-V or WAIS-IV.

To the Evaluator: All index scores as well as all subtest scaled scores are required. Landmark requests the Digit Span subtest to be reported as Digit Span *forward* and *backward*.

II. Academic Achievement Testing

WIAT (Wechsler Individual Achievement Test)

or

Woodcock Johnson Tests of Achievement

or

Kaufman Test of Educational Achievement

or

other similar measures of academic achievement

III. Assessment of Psycho-Social Functioning

BASC (Behavioral Assessment Scale for Children)

or

CBCL (Child Behavior Checklist)

or

other similar measures of psycho-social functioning

Please note:

Any additional testing that has been administered within the past three years (such as speech and language or occupational therapy evaluations) must be submitted along with your application.

Thank you.
